ORIGINAL

Dear Commission,

As an APS ratepayer and small business owner, I'm concerned about energy prices, and I hate seeing my rates go up.

I know one of the greatest costs is building new generation and transmission lines. The best way we can avoid that cost is through energy efficiency. By decreasing consumption and using demand response to shave off peak load conditions, we can delay building new coal and gas plants, hedge against fuel volatility, and protect business owners like me from more energy price increases.

Arizona's Energy Efficiency Standard is crucial to advance. Please help Arizona ratepayers that you serve by making sure utilities adhere to this standard.

Sincerely,

*Laura Snipek*
